

PORTABLE POWER GENERATION

Diesel & Gas Generators

In the rental industry, HIPOWER SYSTEM's portable diesel and natural gas generators are renowned for their innovative design, high quality and minimum service and maintenance requirements. No matter what the size, rating, application or environment, we offer a portable solution engineered for superior operation, maximum flexibility and greater ROI.

Every portable unit features high-performance engines managed by best-in-class

controls, packaged in compact, robust weather-resistant enclosures with spill containment and sound attenuation. To accommodate the rugged terrain in outdoor work environments such as drilling operations, portable models are designed with a maximum level of structural integrity. Units feature oversized, reinforced doors and/or dismountable panels for easy service and maintenance access.

Made in the U.S.A.
